

Client broadband

Client Broadband from Broadscape

Equip your meeting rooms and public areas with wireless Internet access for visiting clients.

- A fully managed wireless broadband (Wi-Fi) system for visiting clients
- Seamless coverage across meeting rooms and reception areas
- Entirely separate from the office network with no data security issues
- Supports access to clients' corporate virtual private networks
- Easy for authorised clients to use and staff to manage
- 24/7 monitoring and management to ensure continuous availability
- Branded login web page custom built to your design
- Complete flexibility over pricing: you can provide the service for free or charge your clients, retaining 100% of the revenue
- Integration with client billing systems if required
